

MAYANK MITTAL

CSE 4th Year Undergraduate at IIIT-Hyderabad

@ mayankmittal29042004@gmail.com 9876118281 in LinkedIn Github

WORK EXPERIENCE

Software Engineer Intern | Atlassian

May 2025 – July 2025 Bengaluru, India

- Engineered a scalable **Root Cause Analysis (RCA)** feature, which generated **25+ accurate suggestions** during initial testing, empowering on-call agents by automating incident resolution.
- Architected a **modular orchestration engine** to dynamically **ingest and fetch** contextual data from diverse sources for comprehensive incident analysis aiming to reduce incident **MTTR** in **AIOps**.
- Created **Splunk** dashboard for real-time system **observability** and validated new data-source **APIs** using **Postman**.
- Tech Stack:** Kotlin | Spring Boot | Splunk | Postman

Full-Stack Developer Intern | Product Lab @ IIITH [Github]

Jan 2024 – April 2024 Hyderabad, India [Video]

- Collaborated on **EMRI Assist**, a web application to aid doctors in managing patient treatments in **10,000+ ambulances** for Product Lab, a **startup** at **IIITH**.
- Enabled efficient **doctor-EMT communication** via a **chatbot** made on **LAMA model**, patient vital monitoring, medical document access, and an admin dashboard for **document upload** and management.
- Created **API endpoints** for seamless data management with **Amazon AWS storage**.
- Tech stack:** ReactJS | MongoDB | GraphQL | NodeJS | ExpressJS

PROJECTS

MediMind - RAG-Powered Medical Chatbot [Github]

- Engineered an end-to-end **RAG-based medical chatbot** integrating **LangChain**, **OpenAI GPT**, and **Pinecone** for **semantic retrieval** from medical PDF knowledge bases.
- Built a **Flask** backend serving a responsive **HTML/CSS/JS** interface, leveraging **HuggingFace (all-MiniLM-L6-v2)** embeddings for **context-aware query responses**.
- Implemented **document ingestion**, **vector search**, and real-time conversational flow; containerized the system using **Docker**.
- Tech Stack:** Python | Flask | LangChain | OpenAI | Pinecone | HuggingFace | Docker | HTML/CSS/JS

VaccineClassifier- ML classification model [Github]

- Devised a **machine learning model** to classify two types of vaccines for patients using **Exploratory Data Analysis**, **imputation of missing values**, **scaling using StandardScaler** and **feature engineering**.
- Employed **K-NN**, **SVM**, **RandomForest**, **Decision Trees**, **Naive Bayes**, and used **ROC-AUC** for evaluation and **GridSearchCV** for **hyperparameter tuning**.
- Tech stack:** Python | Pandas | Seaborn | Matplotlib | scikit-learn

Chatterly - Secure Chat App [Github]

- Architected a **full-stack real-time chat application** on the **MERN stack**, featuring low-latency communication with **Socket.io** and secure **JWT authentication**.
- Crafted a responsive **React/Zustand** frontend with live presence indicators, image sharing via **Cloudinary**, **toast notifications** and multiple themes using **TailwindCSS**.
- Tech Stack:** React | Zustand | Node.js | MongoDB | Socket.io | JWT

EDUCATION

B.Tech in Computer Science

IIIT-Hyderabad

Oct 2022 – July 2026 CGPA - 8.56

Class XII - CBSE

MGN Public School, Jalandhar

May 2022 95%

Class X - ICSE

St. Joseph's Sr. Sec. School, Jalandhar

March 2020 97.8%

ACHIEVEMENTS

- AIR **1008** in JEE-ADVANCED 2022.
- AIR **573** with **99.946 percentile** in JEE-Mains 2022 (**top 0.05%**).
- Secured All India rank **552** in KVPY-SX.
- Secured All India rank **873** in KVPY-SA.
- Qualified National Olympiad of Chemistry(IOQC)-Part-1 **National top 1%**

SKILLS

Languages C/C++, Python, Kotlin, JavaScript, HTML/CSS	Frontend React.js, TailwindCSS
Backend Node.js, Spring Boot, Express.js, REST APIs, JWT, SMTP, MCP	Tools & Databases Git, Docker, AWS, MongoDB, GraphQL, MySQL Splunk, Postman, Latex
ML & AI Numpy, Pandas, Keras, LangGraph, RAG, n8n, TensorFlow, PyTorch, LangChain, AI agents	Core Concepts DSA, OOPS, Operating Systems, Machine and Deep Learning, Generative AI
